

Job Description

Job title: QA Tester
Location: Sofia, Bulgaria
Type: Full- Time

Company Background

GAN is an award winning global supplier of industry leading casino content, fast flexible gaming systems and turnkey social gaming. The company was founded in 2002 with the aim of capturing the emerging online skill-games market. Having led the market in backgammon and regional skill games in Italy and Spain, we broadened our product portfolio to offer a full gaming software system as well as becoming a leading developer of online casino games.

GAN utilises the latest server technologies including Microsoft SQL Server Enterprise and Apache TomEE, deployed in high-availability configurations for 24-7 operations around the world. Our global presence is extensive: as well as offices in the UK (London, Kensington) and in the US (Nevada, Las Vegas and Chicago, Illinois) also operate from other global locations including Rome, Atlantic City and Brisbane. We pride ourselves on the many industry awards we have picked up along the way - latterly for eGaming Review's 'Casino Software Supplier of the Year' award and Casino Platform of the Year at the North America EGR awards.

In Europe, GAN operates in multiple regulated jurisdictions. We operate a B2C brand directed at the UK market, offering a suite of skill and casino table and third party slot games, together with offering game content and/or platforms to some of the biggest names in the industry, including inter alia, PaddyPower, William Hill, Rank, Lottomatica, Sisal MatchPoint, and SNAI.

The company has strategically positioned itself in the US as a pioneer in this emerging regulated market. In New Jersey, we have partnered with Betfair to provide a real-money online gaming site since November 2013. In unregulated US states, we have developed an innovative, free-to-play casino to land-based casino operators seeking to monetise their large databases online. The first of these launched in April 2014 with the Foxwoods Casino Resort in Connecticut, the second with Empire City Casino in New York State in October 2014, followed by Parx Casino in Pennsylvania in March 2015. Most recently, we have taken our simulated gaming product into Australia with our Club8Casino site launching in March 2015 and are excited by a busy pipeline of new casinos coming on board.

GAN listed on the London Stock Exchange in November 2013, giving us a solid foundation from which to exploit the emerging opportunities within both real money and simulated gaming. GAN is licensed and regulated in the UK, Europe and USA and works closely with regulatory authorities, government agencies and independent certification laboratories to ensure fairness and compliance with all applicable laws and regulations.

Overview of the Role - QA Tester

The candidate should be self-motivated, creative and proactive, to work successfully in a fast-paced environment including multiple platforms and diverse technologies. The individual will work closely with developers, project managers, and other stakeholders throughout the Software Development Life Cycle, executing test iterations, tracking / reporting results, troubleshooting and coordinating defect resolution. The individual should have an understanding of Software Development Life Cycle processes and the QA lifecycle and methodology. Ideally the candidate should have experience of automated testing.

Excellent written and spoken English is critical as you will be required to communicate with colleagues, line managers and occasionally large multinational clients.
