Job Description

Job title: **Java Trainee**
Location: **Sofia, Bulgaria**
Type: **Part/Full Time**

Company Background

GAN is an award winning global supplier of industry leading casino content, fast flexible gaming systems and turnkey social gaming. The company was founded in 2002 with the aim of capturing the emerging online skill-games market. Having led the market in backgammon and regional skill games in Italy and Spain, we broadened our product portfolio to offer a full gaming software system as well as becoming a leading developer of online casino games.

GAN's flagship clients are market leading casino operations and best-in-class content development houses. GAN's Simulated Gaming social casino partners include WinStar World Casino, Turning Stone Online Casino, Twin River, Maryland Live! Station Casinos, JACK Entertainment Social Gaming, The Lady Luck Interactive, The Borgata Hotel Casino & Spa, San Manuel Indian Bingo and Casino, Empire City Casino, and Parx Casino.

The company has strategically positioned itself in the US as a pioneer in this emerging regulated market. In New Jersey, we have partnered with Betfair to provide a real-money online gaming site since November 2013. We've also launched an Ocean Resort Casino in July 2018.

Team Overview

The talented technology team develops proprietary in-house software running upon these technologies which underpins gaming applications across multiple formats, including HTML5 and native applications for Apple IOS and Android. Additionally, GAN creates and distributes casual mobile games applications such as Solitaire Quest which are made available through the Apple App Store and Google Play.

This role would join the growing Sofia based team where the successful candidate will enjoy working in a dynamic, fast paced and exciting environment using the latest technologies. You will be comfortable in working within an agile and creative development environment on a wide variety of exciting products and features, reacting to constantly evolving and rapidly expanding market.

Overview of the Role – Java Trainee

The candidate should be self-motivated, creative and proactive, to work successfully in a fast-paced environment including multiple platforms and diverse technologies. The individual will work closely with senior developers, project managers, and other stakeholders throughout the Software Development Life Cycle.
Excellent written and spoken English is critical as you will be required to communicate with colleagues, line managers and occasionally large multinational clients.

Daily Tasks

- Develop new features and products that will improve our existing platform
- Working on a newly developed game engine with latest technologies
- Optimize, propose and implement improvements of the system
- Participate and support the automation process of our work
- Fix bugs that were found during the testing of the product
- Participate in the team meetings
- Contribute to the outcome of the team

GAN™
